## Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

### **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Nov 2021**

### **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Mar 2022**

### **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-May 31, 2022**

### **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2020**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-May 31, 2022**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Apr 2022**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Jun 2022**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - Jul 31, 2022**

**Drill Hole Database:**

Provincial

DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Provincial

EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011- Jul 31, 2022****Environmental Registry:**

Provincial

EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994 - Jul 31, 2022****Environmental Compliance Approval:**

Provincial

ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Mineral Occurrences:**

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**National Environmental Emergencies System (NEES):**

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Water Well Information System:**

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Jan 31, 2022**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

The ERIS **Physical Setting Report - PSR** provides comprehensive information about the physical setting around a site and includes a complete overview of topography as well as hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, and radon are also included for review.

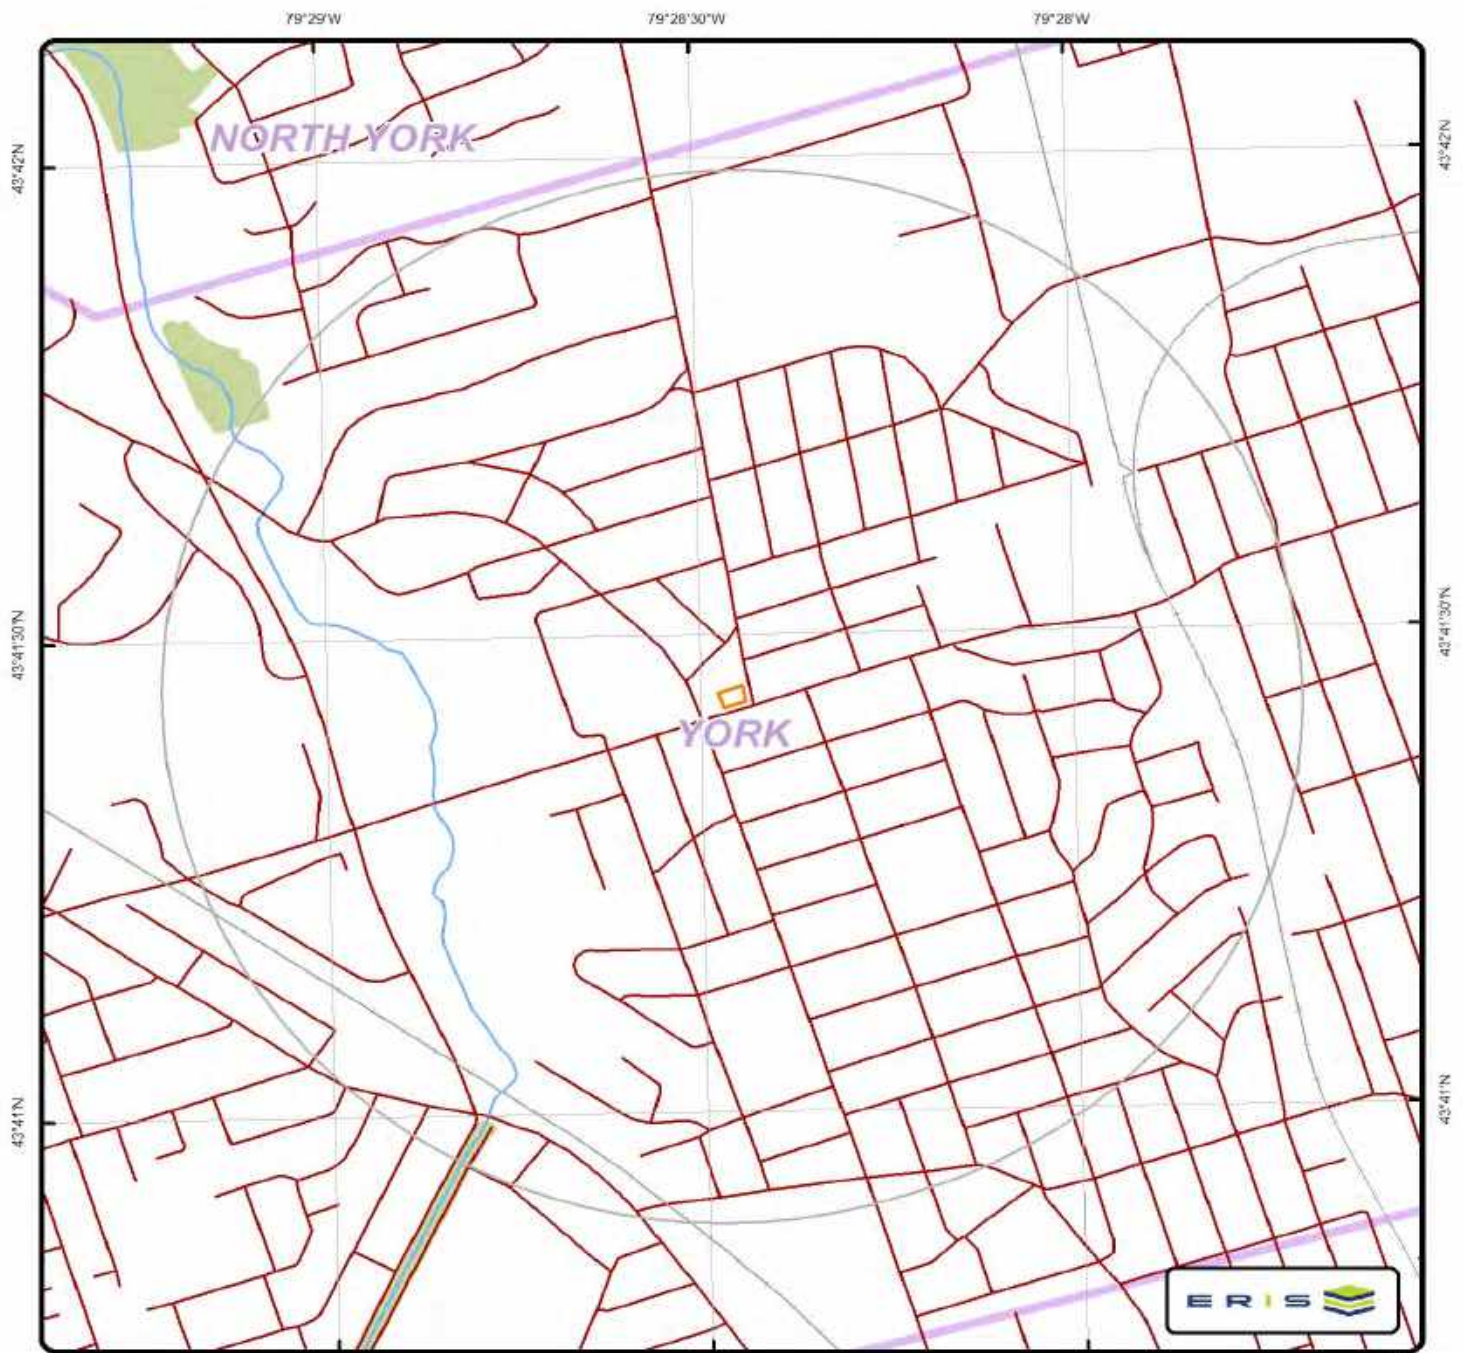

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

### Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

## **Federal Sources**

### **Bedrock Geology of Canada**

The Geological Map of Canada is scaled at 1:5,000,000. This map is created by Geological Survey of Canada and published by Natural Resources Canada.

**BEDROCK GEOLOGY**

### **Health Canada Radon Information**

This source is the results from the Cross-Canada Survey of Radon Concentrations in Homes, a two-year study conducted by Health Canada's National Radon Program. The aims of this study were to obtain an estimate of the proportion of the Canadian population living in homes with radon gas levels above the guideline of 200 Bq/m<sup>3</sup>, to identify previously unknown areas where radon gas exposure may constitute a health risk, and to build, over time, a map of indoor radon gas exposure levels across Canada.

**RADON**

### **National Energy Board Wells**

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**NEBP**

### **Soil Landscapes of Canada (SLC)**

Major characteristics of soil and land such as surface form, slope, water table depth, permafrost and lakes.

**SLC**

### **Surficial Geology of Canada**

This map contains information on surficial materials and associated landforms left by the retreat of the last glaciers and non glacial environments. It is based on compilation of existing maps. This data was authored by the Geological Survey of Canada and published by Natural Resources Canada.

**SURFICIAL GEOLOGY**

### **Toporama**

Toporama covers the entire area of Canada's landmass and provides topographic, geo-referenced, and symbolic information in a raster format at 1:50,000 scale. This is a digital topographic reference product made available by Natural Resources Canada (NRCan).

**TOPORAMA**

## **Provincial Sources**

### **Area of Natural and Scientific Interest**

Areas of Natural and Scientific Interest (ANSIs) are lands and waters with features that are important for natural heritage protection, appreciation, scientific study or education. This dataset is made available by Ontario Ministry of Natural Resources.

**ANSI**

### **Bedrock Geology of Ontario**

The Bedrock Geology layer shows the distribution of bedrock units underlying Ontario at a 1:250,000 scale. The geology of the province consists of Precambrian rocks of the Canadian Shield and Phanerozoic sedimentary rocks that overlie the Canadian Shield. This layer was compiled by the Precambrian Geoscience Section of Ontario Geological Survey.

**BEDROCK GEOLOGY**

### **Ontario Detailed Soil Survey (DSS3)**

Soil surveys have been published for most of the agricultural areas, and many surrounding areas, across Canada. Data from these surveys comprise the most detailed soil inventory information in the National Soil DataBase. Data is made available by Agriculture and Agri-Food Canada

**SOIL SURVEY**

### **Ontario Oil and Gas Wells**

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSRLibrary has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**OOGW**

### **Provincial Groundwater Monitoring Network**

**GROUNDWATER**

## Appendix

Groundwater level and chemistry data from monitoring wells that are part of the Provincial Groundwater Monitoring Network (PGMN) Program. Precipitation data (rain) is also available for some sites. This data is provided by Ontario Ministry of Environment and Climate Change.

### **Surficial Geology of Ontario**

The Surficial Geology dataset contains a layer depicting the distribution and characteristics of surficial deposits across southern Ontario. This data set is authored by the Ontario Geological Survey.

**SURFICIAL GEOLOGY**

### **Topographic Map of Ontario**

The Ontario Basic Mapping program provides a relationship between topographic information and the provincial geographical referencing grid, thereby forming the foundation for a comprehensive provincial geographical referencing system. This data is made available by the Ontario Ministry of Natural Resources and Forestry. This is ERIS self-designed topographic map template at 1:10,000.

**TOPOGRAPHIC MAP**

### **Water Well Information System**

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**WWIS**

### **Wetlands of Ontario**

The Ministry of Natural Resources and Forestry has made available a database of wetlands in Ontario. Certain attributes identify wetlands that have been evaluated with the Ontario Wetland Evaluation System (OWES), and of those which ones have been designated as Provincially Significant Wetlands (PSW).

**WETLAND**

## **Private Sources**

### **Oil and Gas Wells**

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**OGWE**

### **Radon Zone Information**

The Radon Potential Map is developed by Radon Environmental Management Corporation. Its objective was to illustrate the relative variation of radon risk across the country, and in 2011 it published its first geologic Radon Potential Map of Canada.

### **NO RECORD FOUND IN CURRENT DATABASE**

Hello,

Thank you for your request for confirmation of public information. TSSA has performed a preliminary search of TSSA's current database.

- We confirm that there are no records in our current database of any fuel storage tanks at the subject address(es).

This is not a confirmation that there are no records in the archives. For a further search in our archives, please submit an application for release of public information (PI Form) through TSSA's new Service Prepayment Portal. The associated fee must be paid via credit card (Visa or MasterCard) through a secure site.

Please follow the steps below to access the new application(s) and Service Prepayment Portal:

1. Click Release of Public Information - TSSA and click "need a copy of a document";
2. Select the appropriate application, download it and complete it in full; and
3. Proceed to page 3 of the application and click the link TSSA Service Prepayment Portal under payment options (the link will take you the secure site to pay for the release via credit card).

Accessing the Service Prepayment Portal:

1. Select new or existing customer (\*if you are an existing customer, you will need your account # & postal code to access your account);
2. Select the program area: AD (Amusement Devices), BPV (Boilers and Pressure Vessels), ED (Elevating Devices), FS (Fuels Services), OE (Operating Engineers) or SKI (Ski Lifts) and click continue;
3. Enter the application form number (obtained from bottom left corner of application form) and click continue;
  - a. When selecting the application form number from the drop-down menu, please make sure you select the application that begins with "PI" (i.e. PI-FS, PI-BPV etc.);
4. Complete the primary contact information section;
5. Complete the fees section;
6. Upload your completed application; and

7. Upload supporting documents (if required) and click continue.

Once all steps have been successfully completed, you will receive your receipt via email.

Questions? Please contact TSSA's Public Information Release team at [publicinformationservices@tssa.org](mailto:publicinformationservices@tssa.org).

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind Regards,

Kim

**APPENDIX X**

**PHASE ONE CONCEPTUAL SITE MODEL**

## PHASE ONE CONCEPTUAL SITE MODEL

The Phase One Conceptual Site Model (CSM) showing the potentially contaminating activities (PCAs) is presented on Figure 4, and the Areas of Potential Environmental Concern (APECs) are presented on Figure 5. A summary of the CSM is provided below.

The Site is located on the northwest side of Keele Street and Eglinton Avenue West, in the City of Toronto (see Figure 1). The Site has a rectangular shape with a total area of approximately 0.14 ha (1,352.6 m<sup>2</sup>) and is currently occupied by conjoined buildings (between one and two stories tall). The buildings are currently occupied by various tenants for residential and commercial use, including multiple private residences, a grocery store, two beauty salons, and a restaurant.

**Potentially Contaminating Activities:** Several PCAs, as listed in Table 2 of Schedule D of O. Reg. 153/04, were identified on or potentially affecting the Site.

Overall a total of 70 PCAs were identified on the Phase One property and within the Phase One Study Area, of which 13, may be contributing to an area of potential environmental concern (APEC) at the Site.

**Areas of Potential Environmental Concern:** As a result of the PCAs identified and other considerations, the following APECs were identified at the Site:

| APEC <sup>1</sup> | LOCATION OF APEC ON PHASE ONE PROPERTY  | POTENTIALLY CONTAMINATING ACTIVITY <sup>2</sup>   | LOCATION OF PCA (ON-SITE or OFF-SITE) | CONTAMINANTS OF POTENTIAL CONCERN <sup>3</sup> | MEDIA POTENTIALLY IMPACTED (Ground water, Soil, and/or Sediment) |
|-------------------|---|---|---------------------------------------|--|--|
| APEC 1            | Northeastern corner of the Site   | 28 - Gasoline and Associated Products Storage in Fixed Tanks  | On-Site<br>PCA 1                      | BTEX<br>PHCs<br>PAHs                           | Soil<br>Groundwater  |
| APEC 2            | Northern portion of the building at the 2654 Eglinton Ave W portion of the Site | 55 - Transformer Manufacturing, Processing and Use  | On-Site<br>PCA 2                      | PCBs   | Soil   |
| APEC 3            | 2636 Eglinton Ave W portion of the Site.  | 31 - Ink Manufacturing, Processing and Bulk Storage   | On-Site<br>PCA 3                      | VOCs<br>Metals                                 | Soil<br>Groundwater  |

### ***Contaminants of Potential Concern:***

The Contaminants of Potential Concern (COPCs) associated with the APECs are as follows:

- benzene, toluene, ethylbenzene, xylenes (BTEX)
- petroleum hydrocarbons (PHC F1-F4)
- volatile organic compounds (VOCs)
- polycyclic aromatic hydrocarbons (PAHs)
- metals and inorganic parameters (including hydride-forming metals [As, Sb, Se], hot water soluble boron [B(HWS)], hexavalent chromium [Cr(VI)], cyanide [CN-], and mercury [Hg])
- polychlorinated biphenyls (PCBs)

### ***Underground Utilities:***

In general, potential migration pathways for subsurface contaminants at the Site would consist of buried services or remnants of former buried services.

## Geology/Hydrogeology:

Available regional or site specific geological and hydrogeological information are summarized below:

### SUMMARY OF TOPOGRAPHY, HYDROLOGY AND GEOLOGY

| SITE FEATURE                  | DESCRIPTION / DETAILS  |
|-------------------------------|--|
| REGIONAL TOPOGRAPHY           | Site is generally flat with no significant grade difference, slopes gently to the southwest  |
| APPROX ELEVATION (masl)       | Between 127.80 m above sea level (m asl) and 130.08 m asl. Based on the topographic survey provided by Fora.   |
| PHYSIOGRAPHIC REGION          | The Site and Phase One Study Area are located in the physiographic region known as Iroquois Plain, which consists of shallow-water deposits sand and silty sand.                                       |
| OVERBURDEN SOIL STRATIGRAPHY  | Quaternary geology mapping indicates the Site is located in an area of glaciolacustrine deposits, predominantly consisting of sand, gravelly sand and gravel, along with nearshore and beach deposits. |
| BEDROCK AND APPROXIMATE DEPTH | Upper Ordovician shale, limestone, dolostone, and siltstone of the Georgian Bay Formation and is anticipated to be more than 30 m below grade.   |

| WELL FOR CONSUMPTION/ AGRICULTURAL USE | No                        | No                          | N/A   |

**Uncertainty on absence of information:** The main uncertainty associated with the CSM developed for the site relates to the limited information regarding the former use of the Site as well as the limited information regarding activities on neighbouring properties. This lack of information is mitigated by the inherent nature of residential land uses, with are not typically associated with significant PCAs.

Notwithstanding the above, it should be noted that Phase One ESAs have inherent limitations, and therefore findings cannot be considered definitive (i.e., the findings of a Phase One ESA are inherently associated with some uncertainty).

<sup>1</sup> Areas of potential environmental concern (APEC) means the area on, in or under a Phase One property where one or more contaminants are potentially present, as determined through the Phase One environmental site assessment, including through,  
(a) identification of past or present uses on, in or under the Phase One property, and  
(b) identification of potentially contaminating activity.

<sup>2</sup> As set out in Column A of Table 2 of Schedule D.

<sup>3</sup> Contaminants of potential concern (COPC) according to the Method Groups as identified in the "Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act", March 9, 2004, amended as of July 1, 2011:

TERRAPEX DRIVE

**APPENDIX XI**

**QUALIFICATIONS OF THE ASSESSORS**

**Position:** Vice President, Environmental Services  
Project Director, Toronto Office

**Qualifications:** B.A. Economics  
B.Sc. Geological Engineering  
Professional Engineer and Designated "Consulting Engineer", Professional Engineers Ontario  
Registered as Qualified Person per Section 5 and Section 6, O. Reg. 153/04

**Experience:** Terrapex Environmental Ltd. 2004 to present  
Aqua Terre Solutions Inc. 1997 to 2004  
ALTECH Environmental Consulting Ltd. 1995 to 1997

Mr. Sutton is a licensed professional engineer (P.Eng.) and designated "Consulting Engineer" at Terrapex with more than twenty-five years of experience in the environmental engineering consulting industry. Mr. Sutton is also registered as a "Qualified Person" for the purposes of submitting Records of Site Condition ("QP<sub>ESA</sub>") and Risk Assessments ("QP<sub>RA</sub>") with the Ontario Ministry of the Environment, Conservation and Parks, and regularly provides consulting services relating to the assessment and remediation/management of petroleum hydrocarbon, chlorinated solvent, and inorganic contaminants in both overburden and bedrock media, including qualitative and quantitative human health and ecological risk assessment.

In addition to degrees in geological engineering and economics, Mr. Sutton has successfully completed technical training courses in Phase I Environmental Site Assessment, Monitored Natural Attenuation and In-Situ Remediation of Groundwater, Dense Non-Aqueous Phase Liquids in Fractured Rocks and Aquitards, and Human Health Risk Assessment.

Mr. Sutton has qualified as an expert witness and provided testimony in the areas of contaminant hydrogeology and contaminated site assessment and remediation, and routinely provides peer review / expert opinion services to clients in support of due diligence efforts, civil litigation claims, and subrogation claims.

#### **Representative projects include the following:**

City of Toronto: Project Director and Senior Environmental Engineer for a series of site investigation work programs, including Phase I and Phase II ESAs, hydrogeological evaluations, geophysical surveys, and geotechnical investigations, to obtain an approval under Section 46 of the *Environmental Protection Act* to permit the operation of a concrete batching facility at a former industrial waste landfill site.

Industrial client: Lead site assessor for the investigation of several current and formerly industrial properties to identify the extent, magnitude, and source of soil and groundwater trichloroethylene (TCE) contamination. The work was completed in response to a Ministry of the Environment, Conservation and Parks (MECP) "Director's Order" with the determination of the source of the impacts being complicated by the presence of more than five separate properties known or suspected to have historically used industrial solvents.

Build Toronto Inc.: Lead site assessor (QP<sub>ESA</sub>) and lead risk assessor (QP<sub>RA</sub>) for the development of the former Birchcliff Quarry infill property (the "Birchcliff Quarry dump") in Toronto, Ontario. Contaminants of concern evaluated during the risk assessment included metallic and inorganic parameters, polycyclic aromatic hydrocarbons, petroleum hydrocarbons, and volatile organic compounds.

Developer client: Lead site assessor (QP<sub>ESA</sub>) and lead risk assessor (QP<sub>RA</sub>) related to obtaining a Record of Site Condition for the residential development of a former welding facility that used trichloroethylene (TCE) as a degreasing agent. The work included horizontal and vertical delineation of both soil and groundwater impacts as well as soil vapour sampling to assess potential vapour intrusion concerns.

Industrial client: Lead risk assessor (QP<sub>RA</sub>) relating to the management of VOC impacts at and downgradient of a former manufacturing facility in eastern Ontario. Contaminants of concern comprise trichloroethylene (TCE) and degradation products, and risk assessment works included both soil vapour and indoor air sampling to evaluate vapour intrusion risks.

**Position:** Project Manager, Toronto Office

**Qualifications:** B.A.T. (Hons.) Integrated Environmental Site Remediation

**Experience:** Terrapex Environmental Ltd. 2007 to present

Mr. Deans is a Project Manager and Certified Engineering Technologist (C.E.T.) at Terrapex with experience coordinating, supervising and managing site assessments for industrial, government, and private clients. Mr. Deans is proficient in conducting Phase I and Phase II ESAs, planning and conducting monitoring programs as well as facility decommissioning and remediation activities. He has expertise with conducting soil vapour surveys, topographical surveys, Designated Substance Surveys, and numerous soil sampling methods (i.e., drilling and test pit excavation).

Mr. Deans has extensive experience collecting various media samples (soil, sediment, soil vapour, groundwater, surface water and indoor air) in accordance with Provincial protocols as well as materials and supplies sourcing, field supervision, data interpretation, and reporting.

**Representative projects include the following:**

**Petroleum Clients:** Supervised the decommissioning of underground storage tanks, removal of facilities and removal of contaminated soil at several sites in Southern Ontario.

**Industrial Client:** Conducted a designated substances survey per O. Reg. 490/09 as well as an asbestos survey involving laboratory analyses of potential asbestos containing materials, and prepared the hazardous materials assessment report.

**Municipal Client:** Management of an on-going long-term methane vapour monitoring program involving both soil gas sampling and analyses and the use of portable field meters for a former landfill area in Southern Ontario. The project involves monitoring locations at three industrial properties as well as a nearby correctional institution, decision-making regarding the need for contingency measure implementation, and the preparation of annual reports for various stakeholders including the Ontario Ministry of the Environment, Conservation and Parks.

**Aggregate Producer:** Management of a long-term groundwater monitoring program involving groundwater flow mapping, groundwater sampling and analyses, and the preparation of annual reports for various stakeholders including the Ministry of Natural Resources and Forestry, the Ministry of the Environment, Conservation and Parks, and a local municipality.

**Government Client:** Completed "Enhanced Phase I ESA" investigation of four communications sites (light stations and towers) and associated buildings in Northern Ontario. Work included standard site inspection, record reviews, and interviews for a Phase I Environmental Site Assessment as well as collecting soil samples using hand augers and shovels, and sediment sampling using a Pjojnar dredge sampler for subsequent laboratory analyses.

**Remote First Nation Client:** Conducted field work for a Phase II ESA to delineate diesel impacts around a former aboveground storage tank location and surrounding locations on the reserve. Supervised the drilling operations and took split spoon soil samples throughout the course of the drilling. Conducted in-situ chemical injection to remediated diesel impacts to the groundwater. Tracer dye tests were also conducted to determine the path the groundwater was taking in the subsurface. Sediment sampling was also conducted along bank of river to evaluate the potential for diesel impacts within the sediments of the river.

**Developer:** Managed field assessment activities and prepared Environmental Site Assessment documentation in support of an environmental risk assessment for a proposed residential development of a former commercial property in downtown Toronto, Ontario. Work was undertaken to support the filing of a Record of Site Condition per O. Reg. 153/04. Contaminants of concern at the property included metallic and inorganic parameters, polycyclic aromatic hydrocarbons, petroleum hydrocarbons, and volatile organic compounds. Environmental Site Assessment work was completed in 2016. Risk Assessment work was completed and a Record of Site Condition was filed for the property in 2018.

**Position:** Environmental Engineer and Risk Assessor, Hamilton Office

**Qualifications:** B.Sc. Environmental Chemical Engineering  
Licensed Professional Engineer, Association of Professional Engineers of Ontario  
Licensed Professional Engineer, Association of Professional Engineers and Geoscientists of Alberta

**Experience:** Terrapex Environmental Ltd. June 2011 to present

Ms. Madden is an Environmental Engineer and Environmental Risk Assessor with Terrapex Environmental, and is recognized as a licensed professional engineer in both Ontario and Alberta. Since 2011, Ms. Madden has worked on numerous Phase One and Phase Two ESAs, soil vapour and indoor air quality assessments, and site remediation programs in support of filing a Record of Site Conditions at variety of sites, including retail fuel outlets, automotive garages, institutional buildings, and residential homes. Since 2016, Ms. Madden has contributed to multiple O. Reg. 153/04-compliant Tier 3 Risk Assessments and Modified Generic Risk Assessments to support the filing of Records of Site Condition, as well as due diligence risk assessments to support real estate and financial transactions.

Ms. Madden's field experience includes conducting record reviews, interviews and site inspections, collection of soil vapour and indoor air samples, supervising various soil and rock drilling techniques, logging of soil stratigraphy and soil vapours, collection of soil and groundwater samples for laboratory analysis, and the supervision of underground storage tank decommissioning, infrastructure upgrades, and removal of contaminated soil.

**Representative projects include the following:**

**Building Developer:** Completed a successful Modified Generic Risk Assessment (MGRA) for a parcel of land included in a larger residential development plan. Contaminants of concern identified with the former public transportation commuter parking lot included inorganic parameters. Acceptance of the risk assessment was obtained within three months of the original risk assessment submission date.

**Real Estate Development Company:** Contributed to a successful Tier 3 Risk Assessment under O. Reg. 153/04, as amended, at a former gas station and service garage located in Toronto, Ontario. Assessed potential human health and ecological risks due to on-Site soil and groundwater impacts caused by degrading underground fuel storage tanks and widespread solvent use.

**Municipal Client:** Contributed to a successful Tier 3 Risk Assessment under O. Reg. 153/04, as amended, at a former industrial property in Toronto, Ontario used for brick works, quarrying, landfilling, and a golf driving range. Contaminants at the property included volatile organic compounds (VOCs), PHCs, PAHs, metals and inorganic parameters, dioxins and furans, and polychlorinated biphenyls (PCBs). Assisted with the determination of human health and ecological risks, including running Johnson and Ettinger soil and groundwater models to determine the potential for subsurface vapour intrusion, and writing and compiling the final reports. The consideration of methane was also required due to historic landfilling operations.

**Petroleum Client:** Conducted soil vapour and indoor air sampling at multiple sites (former retail fuel outlets, automotive service centres, and residential homes). Wrote soil vapour and indoor air quality reports to conclude findings and outline methodology and reasoning for sampling locations, frequency, and duration.

**Various Clients:** Completion of multiple Phase One ESAs at retail gas outlets, automotive service centres, and commercial buildings in support of filing a Records of Site Conditions; including records review, interviews, site inspection, identification of Areas of Potential Environmental Concern, development of a Conceptual Site Model, and writing the final report.

**Various Clients:** Completion of multiple Phase Two ESAs and remedial excavation activities in support of filing a Record of Site Conditions at fuel outlets, chemical manufacturers, and municipal facilities; including coordination of site activities with subcontractors, development of a Sampling and Analysis Plan (as per Ontario Regulation 153/04), collection of soil and groundwater samples for laboratory analysis of Contaminants of Concern, interpretation of laboratory results, development of a Conceptual Site Model, and report preparation.
