## 1.0 EXECUTIVE SUMMARY

Terrapex Environmental Ltd. (Terrapex) was retained by Fora Developments (Fora) to conduct a Phase One environmental site assessment (ESA) of the property located at 1856-1856A Keele Street and 2636-2654 Eglinton Avenue West, Toronto, Ontario (the Phase One property, hereinafter referred to as the Site). It is understood that the study documented herein is being undertaken for the purposes of filing a Record of Site Condition per Ontario Regulation (O. Reg.) 153/04 under the Environmental Protection Act, *Records of Site Condition - Part XV.1 of the Act*.

The objective of the investigation was to identify actual and potential sources of contamination associated with the Site arising from current and/or historical activities on the Site and on properties within the Phase One study area in order to satisfy the following Phase One ESA general objectives listed in O. Reg. 153/04:

- to develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One property;
- to determine the need for a Phase Two ESA; and,
- to provide a basis for carrying out any Phase Two ESA required.

The Site is located on the northwest side of Keele Street and Eglinton Avenue West, in the City of Toronto (see Figure 1). The Site has a rectangular shape with a total area of approximately 0.14 ha (1,352.6 m<sup>2</sup>) and is currently occupied by conjoined buildings (between one and two stories tall). The buildings are currently occupied by various tenants for residential and commercial use, including multiple private residences, a grocery store, two beauty salons, and a restaurant.

It is understood that the Fora proposes a redevelopment of the Site consisting of a high-rise building in excess of thirty storeys, and with four levels of underground parking garage. The current use at the Site would constitute commercial use as per O. Reg. 153/04 (*Records of Site Condition – Part XV.1 of the Act*). As the proposed development would involve a change in the use of the Site from commercial property use to residential property use, per Section 168.3.1 of the Ontario *Environmental Protection Act*, it is necessary to file a Record of Site Condition before the use of the Site can be changed.

The Site is legally described as Part of Lot A, Registered Plan 285, City of Toronto. The municipal addresses for the Site are 2636-2654 Eglinton Avenue West, Toronto, Ontario.

A total of 70 potentially contaminating activities (PCAs) relating to activities at the Site and within the Phase One Study Area that were evaluated for their potential to contribute to an Area of Potential Environmental Concern (APEC). Based on a detailed review of the available information relating to the PCAs, a total of ten APECs were identified on the Site.

**APEC 1: Northeastern corner of the Site.** An oil-fired water heating system is present on the Site in 1962. During the Site reconnaissance, an above-ground storage tank (AST) was also identified on the 1856 Keele Street portion of the Site (PCA 1).

**APEC 2: Northern portion of the building at the 2654 Eglinton Avenue West.** A spill of 5 L of transformer oil to the vault and drain due to equipment failure (PCA 2).

**APEC 3: 2636 Eglinton Avenue West portion of the Site.** Photography and printing studios have been historically present at the Site at 2636 Eglinton Avenue West (PCA 3).

**APEC 4: 2642 Eglinton Avenue West portion of the Site.** A textile operation identified as Enza Fashion and Textiles operated on the 2642 Eglinton Avenue West portion of the Site in 1962 (PCA 4).

**APEC 5: Western property boundary.** An automotive service garage was historically present at the location of 2660 Eglinton Avenue West (PCA 5).

**APEC 6: Western property boundary.** Imperial Oil received a permit to develop a gas station in 1949 (PCA 6).

**APEC 7: Northwestern property boundary.** Toronto Transit Commission is registered as a car wash. Delsan is also registered as a generator of oil skimmings and sludges at 111 Yore Road (PCA 7).

**APEC 8: Entire Site.** Fill materials could be associated with the historical re-grading associated with various developments and additions on the Site (PCA 39).

**APEC 9: 1856 Keele Street portion of the Site.** An electronic repair and service business operated at the 1856 Keele Street portion of the Site between 1970 and at least 2001 (PCA 40).

**APEC 10: Eastern and southern property boundary.** Several dry cleaning operations were presented east, southeast, and south of the Site (PCA 57, PCA 60-62).

**APEC 10: Eastern and southern property boundary.** Operation of dry cleaning businesses on off-Site properties to the east and south of the Site (PCAs 60, 61, and 62).

Based on the findings and results of the Phase One ESA, several APECs have been identified at the Site; therefore, a Phase Two ESA is recommended at this Site. A Phase Two would be required in order to file a record of site condition (RSC) for the Phase One Property, in accordance with the requirements of O. Reg. 153/04.

## 2.0 INTRODUCTION

Terrapex Environmental Ltd. (Terrapex) was retained by Fora Developments (Fora) to conduct a Phase One Environmental Site Assessment (ESA) of the property located at 1856-1856A Keele Street and 2636-2654 Eglinton Avenue West, Toronto, Ontario (the Phase One property, hereinafter referred to as the Site). The current use at the Site would constitute commercial use as per O. Reg. 153/04 (*Records of Site Condition – Part XV.1 of the Act*). As the proposed development would involve a change in the use of the Site from commercial property use to residential property use, per Section 168.3.1 of the Ontario *Environmental Protection Act*, it is necessary to file a Record of Site Condition before the use of the Site can be changed.

### 2.1 OBJECTIVE

The objective of the investigation was to identify actual and potential sources of contamination associated with the Site arising from current and/or historical activities on the Site and on properties within the “Phase One Study Area” (refer to Section 4.1.1), in order to satisfy the following Phase One ESA general objectives listed in O. Reg. 153/04:

- to develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One property;
- to determine the need for a Phase Two ESA;
- to provide a basis for carrying out any Phase Two ESA required; and,
- if necessary, to provide adequate preliminary information about environmental conditions in the land or water on, in or under the Phase One property for the conduct of a Risk Assessment following completion of a Phase Two ESA.

### 2.2 PHASE ONE PROPERTY INFORMATION

Information regarding the location and identification of the Phase One property and the party authorizing this study is provided in Table 1 below.

The Site is located on the northwest side of Keele Street and Eglinton Avenue West, in the City of Toronto (see Figure 1). The Site has a rectangular shape with a total area of approximately 0.14 ha (1,352.6 m<sup>2</sup>) and is currently occupied by conjoined buildings (between one and two stories tall). The buildings are currently occupied by various tenants for residential and commercial use, including multiple private residences, a grocery store, two beauty salons, and a restaurant.

It is understood that the Fora proposes a redevelopment of the Site consisting of a high-rise building in excess of thirty storeys, and with four levels of underground parking garage. The current use at the Site would constitute commercial use as per O. Reg. 153/04 (*Records of Site Condition – Part XV.1 of the Act*). As the proposed development would involve a change in the

use of the Site from commercial property use to residential property use, per Section 168.3.1 of the Ontario *Environmental Protection Act*, it is necessary to file a Record of Site Condition before the use of the Site can be changed.

The Site is legally described as Part of Lot A, Registered Plan 285, City of Toronto. The municipal addresses for the Site are 1856-1856A Keele Street and 2636-2654 Eglinton Avenue West, Toronto, Ontario.

Refer to Figure 1 for the location of the Site, and to Figure 2 for the general layout of the Site at the time of the site reconnaissance.

## 2.3 PLAN OF SURVEY

Fora provided a survey titled Plan of Survey Showing Topographical Information of Part of Lot A, Registered Plan 285 (Formerly City of York), City of Toronto, prepared by KRCMAR Surveyors Ltd., dated April 21, 2022. A copy of the plan of survey is included in Appendix I.

## 2.4 ENHANCED INVESTIGATION PROPERTY

An enhanced investigation property is defined in O. Reg. 153/04 as a property that is being used or has been used, in whole or in part, for an industrial use or for commercial use as a garage, a

bulk liquid dispensing facility (including a gasoline outlet), or for the operation of dry cleaning equipment.

The Site is not an enhanced investigation property.

## 3.0 SCOPE OF INVESTIGATION

### 3.1 GENERAL

The Phase One ESA was conducted in accordance with the current requirements of O. Reg. 153/04 and as outlined in the Terrapex proposal to Fora dated April, 29, 2022. The Phase One ESA also meets or exceeds the requirements of a Phase I ESA as prescribed by the Canadian Standards Association Standard Z768-01 (R2012). The five main components of the Phase One ESA scope of work are described below.

**Records Review:** A review was conducted of available historic and current environmental information pertaining to the Site and the Phase One study area in accordance with Schedule D (Phase One Environmental Site Assessments) of O. Reg. 153/04.

**Interviews:** An interview was conducted with a representative of the current owner of the Site. Representatives of the previous owners were not available.

**Site Reconnaissance:** A reconnaissance of the Site and accessible properties within the Phase One study area was conducted for evidence of potential environmental concerns.

**Evaluation:** The information obtained from the records review, interviews, and Site reconnaissance was reviewed, evaluated and interpreted by the Qualified Person (QP) for this project (see Section 3.2 below) in consideration of the Phase One ESA general objectives and any uncertainty associated with the data sources.

**Reporting:** In accordance with the requirements of Schedule D of O. Reg. 153/04, this report documents the findings, conclusions, and recommendations of the Phase One ESA and includes:

- a table of the current and past uses of the Phase One property;
- a table of identified potentially contaminating activities (PCAs) and a table of associated areas of potential environmental concern (APECs);
- a Phase One conceptual Site model (CSM); and,
- conclusions and recommendations made based on the evaluation and interpretation of information obtained for the Phase One ESA.

### 3.2 QUALIFIED PERSON

The Phase One ESA was supervised by Mr. Peter Sutton, P.Eng., Vice-President of Environmental Services at Terrapex, located at 90 Scarsdale Road in Toronto, Ontario. Mr. Sutton is a licensed Professional Engineer in Ontario and meets the qualifications as a QP with the Ministry of the Environment, Conservation and Parks (MECP, formerly known as the Ministry of Environment and Climate Change, MOECC, and Ministry of the Environment, MOE) for the

purpose of creating and submitting RSCs for filing on the Brownfields Environmental Site Registry.

### **3.3 LIMITATIONS**

It should be noted that although Terrapex has attempted to verify information wherever possible, except where explicitly noted, we have relied upon the accuracy of information collected during the records review and interview components.

The general limitations of the study are provided in Section 8.3. Specific limitations of this Phase One ESA are as follows:

- the roof of the buildings were not accessible for safety reasons;
- no access to the residential units 1 and 2 located in 2640 Eglinton Avenue West;
- no access to one of the bedrooms in the residential unit 1 for 2638 Eglinton Avenue West; and,
- a response has been received to our request for file information from the MECP, however we have not yet received the documents.

In the opinion of the QP, none of the above limitations are considered to have compromised the objectives of the Phase One ESA.

## **4.0 RECORDS REVIEW**

### **4.1 GENERAL**

Terrapex obtained and reviewed records relating to the Site and surrounding properties within the Phase One Study Area, in accordance with Schedule D (Phase One Environmental Site Assessments) of O. Reg. 153/04. The records and sources of information reviewed are summarized below, and a list of all documents and data cited in this report is provided in Section 9.0.

#### **4.1.1. PHASE ONE STUDY AREA DETERMINATION**

To determine the Phase One Study Area, Terrapex conducted a preliminary records review to identify any conditions that might warrant an expansion of the Phase One Study Area beyond the minimum required by O. Reg. 153/04. This review included searches / reviews of the following information:

- aerial photographs and satellite images;
- Provincial waste disposal site inventory documents; and,
- reports documenting previously completed environmental investigations of the Site.

The preliminary review did not identify any potential concerns warranting an expansion of the Phase One Study Area. Accordingly, the Phase One Study Area was established to encompass all of the properties that were located in whole or in part, within 250 m of the boundaries of the subject site.

The boundary of the Phase One Study Area is depicted in Figure 3. Note that all distances are calculated from the nearest property boundary of the site to the nearest boundary of the feature/site in question and are approximate.

#### **4.1.2. FIRST DEVELOPED USE DETERMINATION**

Information obtained during the records review portion of the work program was used to determine the date of the first developed use of the Site, as defined in O. Reg. 153/04, summarized in Table 2 below:

**TABLE 2: FIRST DEVELOPED USE**

| YEAR | SITE FEATURES  | POTENTIALLY CONTAMINATING ACTIVITY <sup>1</sup> | REFERENCE/SOURCE  |
|------|--|---|---|
| 1954 | The Site was first observed to be developed with commercial buildings in 1954. | None identified                                 | Aerial photographs<br>Previous report (Property Condition Assessment) |

<sup>1</sup>As set out in Table 2 in Schedule D of O. Reg. 153/04.

Based on the above, it was determined that the first developed land use at the Site was around 1954 when the property was used for/developed for commercial purposes.

#### 4.1.3. FIRE INSURANCE PLANS

ERIS Environmental Risk Information Services Ltd. (ERIS) provided an Enviroscan search (provided by Opta Information Intelligence) for the site and surrounding properties. A summary of the relevant information obtained from the fire insurance products is presented in Table 3 below, including identification of operations that are considered to be PCAs under O. Reg. 153/04.

A copy of Fire insurance products reviewed is included in Appendix II.

#### 4.1.4. CHAIN OF TITLE

The Site has been used for commercial purposes since approximately 1954, after which there are records of the business operations located from other sources. As such, in the opinion of the QP, a title search would not contribute significant additional information regarding the environmental condition of the Phase One property. Nonetheless, a full title search will be conducted prior to submitting a Record of Site Condition for the purposes of confirming information in the Table of Current and Past Uses, and an updated final report will be issued. All Land Registry information in the updated final report will be included in Appendix III.

#### 4.1.5. ENVIRONMENTAL REPORTS

Terrapex was provided with the following previous environmental reports for review as part of the scope of the current Phase One ESA.

- **Property Condition Assessment (PCA), 2654 Eglinton Avenue West, Toronto, Ontario , prepared for The Hazcon Group Ltd by S2S Environmental Ltd (S2S), dated September 9, 2011.**

| <b>S2S , 2011, PCA</b>            |  |
|-----------------------------------|--|
| <b>Objective/Work Program</b>     | The work program that was completed was a property condition assessment for 2654 Eglinton Avenue West. The PCA was requested by Hazcon on behalf of the prospective purchaser for financing purposes.  |
| <b>Comments/Limitations/Other</b> | <ul style="list-style-type: none"> <li>• The PCA was conducted only on the 2654 Eglinton Avenue West Property.</li> <li>• The property was occupied by an Image Beauty Supply House</li> <li>• The building was constructed in 1954</li> <li>• Various renovations and additions had been completed for the building but exact dates and details of the work were not available at the time of the inspection</li> <li>• The total building floor area which includes the basement was 1,207 m<sup>2</sup></li> <li>• Findings of the PCA included the following:               <ul style="list-style-type: none"> <li>○ The building was in fair condition</li> <li>○ The building was structurally sound and no evidence of structural faults</li> <li>○ Active roof leaks were identified at the time of the inspection.</li> </ul> </li> </ul> |

#### 4.1.6. PROPERTY USE RECORDS

A municipal directory search was conducted for the Site and neighbouring properties within 250 m for years between 1925 and 2001. Municipal directory information was obtained by ERIS.

Based on a review of the information obtained, a summary of search results that are considered to be PCAs, or otherwise of potential environmental concern to the Site, is provided in Table 4 below:

## 4.2 ENVIRONMENTAL SOURCE INFORMATION

### 4.3.1. ERIS ENVIRONMENTAL DATABASE

Terrapex ordered a RSC Report (Urban) from Environmental Risk Information Services Information Limited Partnership. (ERIS) for any records associated with properties within the Phase One study area. ERIS searched government and privately owned databases for environmental source information, including the information and documents listed in paragraph 7 of subsection 3 (2) in Schedule D of O. Reg. 153/04. The report included a physical settings report (geologic, topographic, hydrogeologic, and well information), and a map of Areas of Natural and Scientific Interest (ANSIs).

The report from ERIS is included in Appendix V and includes a detailed report which presents information for the records found, a Site diagram which plots the locations of the properties for which records were found (provided sufficient address information was available), as well as an appendix which contains a list and descriptions of the databases ERIS searched.

The ERIS report indicated 15 listing(s) for the Site and 354 relevant listings within the phase one study area. Relevant listings are summarized in Table 5 below:

#### 4.3.2. OTHER GOVERNMENT AND REGULATORY DOCUMENTATION

Terrapex contacted representatives of provincial and municipal government agencies to request any environmental information in their files related to the Site, and/or any available information pertaining to nearby water bodies and areas of natural significance within the Phase One Study Area. Terrapex also conducted searches of available information provided on government websites. The responses received from the government agencies, as well as the additional information obtained through website searches, are summarized in the following sections. Copies of relevant documents and maps are included in Appendix IV.

***Ontario Ministry of the Environment, Conservation and Parks (MECP):*** Terrapex submitted a Freedom of Information (FOI) request regarding documented environmental concerns related to the address of 1856-1856A Keele Street and 2636-2654 Eglinton Avenue West, Toronto, Ontario including orders, spills, investigations, waste generator registrations and certificates of approval, as well as general environmental concerns. A request was sent to the MECP on September, 26, 2022.

A written response from the MECP typically requires several weeks. If upon receipt of the response from the MECP any significant environmental issues are identified, Terrapex will forward the response as an addendum to this report.

***MECP Source Water Protection:*** Terrapex conducted a search of the information provided on the MECP on-line map of Source Water Protection Areas to determine whether the Phase One property is located in a well-head protection area, or another area designated as an area for the protection of groundwater. The Site is location within an area under the jurisdiction of the Toronto and Region Conservation Authority (TRCA) . The review indicates the Site in not within a well-head protection area..

***Ontario Ministry of Northern Development, Mines, Natural Resources (MNDMRF):*** Terrapex conducted a search of the information provided on the Ministry of Northern Development, Mines, Natural Resources (MNDMRF) on-line map of Natural Heritage Areas to identify any environmentally sensitive areas or areas of natural significance within the Phase One Study Area.

Search results indicated that there are no Provincial Parks, Conservation Reserves, Areas of Natural or Scientific Interest, or Wetlands in the Phase One Study Area.

***Technical Standards & Safety Authority (TSSA):*** The TSSA was contacted regarding records of fuel storage tanks at the Site and neighbouring sites. Terrapex received a

response from TSSA on November, 01, 2022. No records were found for the Site and neighbouring properties.

**Toronto and Region Conservation Authority (TRCA):** A search was conducted on the TRCA interactive mapping website to determine if the Site is within an area regulated by the TRCA. The results indicated the Site is not within the TRCA Regulated Areas. The Site is located within the Humber River Watershed and the nearest water body, Black Creek, is located 430 m, west of the Site.

**Municipal Records:** Terrapex conducted a search of the information provided on the City of Toronto's interactive mapping application. The results indicated that the Site is not within an environmentally significant area, natural heritage system, provincial ANSI, or provincially significant wetland. The Site is zoned as Commercial Residential "CR SS2 (x2624)".

**Official Plan:** Terrapex conducted a search of the information provided on the City of Toronto's Official Plan to determine whether the Phase One property is located in a wellhead protection area, or another area designated as an area for the protection of groundwater. The review indicated the Site is not within a wellhead protection area or within an area of groundwater protection.

#### **4.3.3. CLIENT FILE INFORMATION**

A proposed redevelopment site plan of the Site, a legal survey, and a Property Condition Assessment report conducted by S2S Environmental Inc. were provided to Terrapex by Fora. No other file information relating to the Site was available.

### **4.3 PHYSICAL SETTING SOURCES**

#### **4.4.1. AERIAL PHOTOGRAPHS**

Aerial photographs were selected (based on availability, quality, and scale) for review to identify changes to topographic features, as well as development of the site and surrounding properties within the Phase One Study Area over the years. The earliest aerial photograph obtained for review was from the year 1947, from City of Toronto Archives.

Terrapex reviewed aerial photographs as well as satellite images available for the years 1947 to 2021 from the City of Toronto on-line archives;

An approximate 10-year intervening time frame between successive photographs/images was considered to be sufficient to permit a reasonable evaluation of the area development and apparent land use history.

The relevant features identified in the aerial photographs and satellite images are summarized in Table 6 below. It should be noted that identification of some specific features at the Site and surrounding areas was precluded by the scale and resolution of the aerial photographs. Copies of the aerial photographs and the satellite images are included in Appendix V.

**TABLE 6 SUMMARY OF AERIAL PHOTOGRAPHS AND SATELLITE IMAGES**

<sup>1</sup>As set out in Table 2 in Schedule D of O. Reg. 153/04.

#### 4.4.2. TOPOGRAPHY, HYDROLOGY, GEOLOGY

The following maps, and/or databases were reviewed in order to document the topography, geology and hydrogeology of the Site and the Phase One study area:

- ERIS Physical Setting Report
- Google Earth on-line images;
- VuMap Interactive Mapping;
- Quarternary Geology of Ontario, Southern Sheet, Map 2556;
- Metropolitan Toronto Bedrock Contours, Ontario Department of Mines, Preliminary Map 102, February 1961;
- Bedrock Geology of Ontario, Southern Sheet, Ontario Geological Survey, Map 2544; and
- Topographic Map, National Topographic Systems (NTS), information current as of 1989, Map 30M/11.

A summary of reviewed information are presented in Table 7 below:

**TABLE 7 – SUMMARY OF TOPOGRAPHY, HYDROLOGY, AND GEOLOGY**

| <b>SITE FEATURE</b>                  | <b>DESCRIPTION / DETAILS</b>  |
|--------------------------------------|---|
| <b>REGIONAL TOPOGRAPHY</b>           | Site is generally flat with no significant grade difference, slopes gently to the southwest   |
| <b>APPROX ELEVATION (masl)</b>       | Between 127.80 m above sea level (m asl) and 130.08 m asl. Based on the topographic survey provided by Fora.  |
| <b>PHYSIOGRAPHIC REGION</b>          | The Site and Phase One Study Area are located in the physiographic region known as Iroquois Plain, which consists of shallow-water deposits sand and silty sand.  |
| <b>OVERBURDEN SOIL STRATIGRAPHY</b>  | Quarternary geology mapping indicates the Site is located in an area of glaciolacustrine deposits, predominantly consisting of sand, gravelly sand and gravel, along with nearshore and beach deposits. |
| <b>BEDROCK AND APPROXIMATE DEPTH</b> | Upper Ordovician shale, limestone, dolostone, and siltstone of the Georgian Bay Formation and is anticipated to be more than 30 m below grade.  |

Copies of reviewed information are provided in Appendix VI.

#### 4.4.3. FILL MATERIALS

Fill materials are not suspected to be present at the Site, other than possibly minor quantities of engineered sand/gravel fill used during construction of the residential structure and associated parking area.

#### 4.4.4. WATER BODIES, AREAS OF NATURAL SIGNIFICANCE AND GROUNDWATER INFORMATION

Based on a review of information and records in the preceding sections, a summary of water bodies, areas of natural significance, if any, and groundwater information within the Phase One study area are summarized in Table 8 below:

**TABLE 8 – SUMMARY OF WATER BODIES, AREAS OF NATURAL SIGNIFICANCE, GROUNDWATER INFORMATION**

| FEATURE                                | WITHIN PHASE ONE PROPERTY | WITHIN PHASE ONE STUDY AREA | DESCRIPTION/ DETAILS  |

#### 4.4.5. WELL RECORDS

Based on a review of information and records in the preceding sections, there are two wells on Site and 132 wells within the Phase One Study Area. The location of the wells are indicated in the ERIS report (Appendix II) and on Figure 3. A summary of relevant water well records with sufficient information on the hydrogeological and geological characteristics of the Phase One Study Area are summarized in Table 9 below:

**TABLE 9 – SUMMARY OF SELECTED WATER WELL RECORDS**

#### 4.4 SITE OPERATING RECORDS

As the site was determined not to constitute an Enhanced Investigation Property as defined in O. Reg. 153/04, a review of site operating records was not required by the regulation.

## 5.0 INTERVIEWS

### 5.1 SITE REPRESENTATIVE

Mr. Paolo Manzi of P2 Management Inc. completed Terrapex's standard Phase I/One ESA Interview Questionnaire via email for this study on November 1, 2022. The relevant information contained in this questionnaire is summarized below.

#### ***Mr. Paolo Manzi, Senior Property Manager of P2 Management Inc:***

- Mr. Manzi has been involved with the Site since 2012.
- All buildings on the property are believed to be constructed in in the 1950's. The 2654 Eglinton Avenue West building was renovated between 2012 and 2013.
- The previous tenants of the property were Image Beauty Salon at 2654 Eglinton Avenue West up to 2012, along with various supermarkets in the 1990's and prior to the 1990's.
- The current tenants of the property are the following:
  - Dollar Tree (retail store) at 2654 Eglinton Avenue West;
  - Hair Salon at 2642 Eglinton Avenue West;
  - Jinjin's Nail Salon at 2636 Eglinton Avenue West;
  - Metro Pizza and Chicken Restaurant at 1856 Keele Street; and,
  - 3 residential units are also located at the property.
- The current property use is mixed retail and residential. The ground floor of the addresses is the retail and commercial use with the residential and offices on the second floors of the properties.
- The previous uses of the property are similar to the current uses.
- Heating Oil AST in the basement of 1856 Keele Street no longer in use.
- The dollar tree underwent major interior renovations between 2012 and 2013.
- A boiler is located in the basements in both the 2642 Eglinton Avenue West and 1856 Keele Street properties. The 2654 Eglinton Avenue West property is heated by a roof top unit.
- There is currently a temporary easement for metrolinx along the northern portion of the property and there are tiebacks for metrolinx on the west side of the property.
- As far as Mr. Manzi was aware, the Site has always been mixed retail and residential.

The statements and information provided by Mr. Manzi were consistent with information obtained from other sources as part of the Phase One ESA investigation. No additional information pertaining to the site could be provided.

## **5.2 SURROUNDING PROPERTY REPRESENTATIVE**

Surrounding property representatives were not contacted as part of the interview process.

## 6.0 SITE RECONNAISSANCE

### 6.1 GENERAL REQUIREMENTS

The reconnaissance of the Site and the Phase One Study Area was conducted by Mr. Raymond Ayuen and Mr. Vivo Subhan of Terrapex, as follows:

**TABLE 10 SITE RECONNAISSANCE PARTICULARS**

<sup>1</sup> As per clause 32 (1) of O. Reg. 153/04.

Cursory observations of the surrounding properties within the Phase One Study Area made during the Site reconnaissance were limited to areas visible from the Site or from publicly accessible areas and vantage points. During the Site reconnaissance, Terrapex photographed the general Site layout, as well as any specific environmental concerns identified on the site or on surrounding properties within the Phase One Study Area.

Specific limitations encountered during the Site reconnaissance are provided in Section 3.3.

The site location plan is shown on Figure 1. The site layout is shown on Figure 2. Selected photographs including general descriptions are provided in Appendix VII.

### 6.2 SPECIFIC OBSERVATIONS AT PHASE ONE PROPERTY

#### 6.2.1. SITE DESCRIPTION AND STRUCTURES

The Site is located on the northwest side of Keele Street and Eglinton Avenue West, in the City of Toronto (see Figure 1). The Site has a rectangular shape with a total area of approximately 0.14 ha (1,352.6 m<sup>2</sup>) and is currently occupied by conjoined buildings (between one and two stories tall). The buildings are currently occupied by various tenants for residential and commercial use, including multiple private residences, a grocery store, two beauty salons, and a restaurant.

Summary of observations from the Site reconnaissance presented in Table 11 below:

**TABLE 11 SITE STRUCTURE OBSERVATIONS**

| SITE FEATURES    | QUANTITY | AGE     | DESCRIPTION                                     | LOCATION                  |

#### **6.4 WRITTEN DESCRIPTION OF INVESTIGATION**

The site reconnaissance was conducted to identify, describe, and document specific items at the Site and at surrounding properties within the Phase One Study Area, in accordance with Schedule D of O. Reg. 153/04. Written descriptions detailing the observations made by Terrapex personnel during the site reconnaissance are provided above in Sections 6.2 and 6.3, for the Site and the Phase One Study Area, respectively.

Discussions regarding the identification of PCAs on the Site and on surrounding properties with the Phase One Study Area are provided below in Section 7.2.

## **7.0 REVIEW AND EVALUATION OF INFORMATION**

### **7.1 CURRENT AND PAST USES**

A summary of the current and past uses of the Phase One property is provided in Table 16, below.

### **7.2 POTENTIALLY CONTAMINATING ACTIVITY**

A potentially contaminating activity as defined in O. Reg. 153/04 is a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in the Phase One property and/or Phase One study area. Details regarding the PCAs that may be contributing to an area of potential environmental concern are provided below in Tables 17.1 and 17.2.

### **7.3 AREAS OF POTENTIAL ENVIRONMENTAL CONCERN**

An area of potential environmental concern, as defined in O. Reg. 153/04, is the area on, in, or under a Phase One property where one or more contaminants are potentially present, as determined through the Phase One environmental site assessment, including through, (a) identification of past or present uses on, in or under the Phase One property and (b) identification of potentially contaminating activity. APECs are summarized in Table 18, and shown on Figure 5.

A discussion and description of how any uncertainty or absence of information obtained in each of the components of the Phase One environmental site assessment could affect the conclusion is provided in Section 7.4, Phase One conceptual model.

### **7.4 PHASE ONE CONCEPTUAL SITE MODEL**

The Phase One ESA conceptual site model (CSM) developed based on the results of the Phase One site assessment is provided in Appendix XII and summarized in Figures 3, 4, and 5. The referenced figures show the Phase One property and Phase One study area including:

- any existing buildings and structures,
- water bodies located in whole or in part on the Phase One study area,
- any areas of natural significance located in whole or in part on the Phase One study area,
- any drinking water wells at the Phase One property,
- roads, including names, within the Phase One study area,
- uses of properties adjacent to the Phase One property,
- areas where any potentially contaminating activity has occurred, including tanks in such areas, and
- any areas of potential environmental concern.

## **8.0 CONCLUSIONS**

### **8.1 WHETHER PHASE TWO ESA REQUIRED BEFORE RSC SUBMITTED**

Based on the findings and results of the Phase One ESA, several APECs have been identified at the Site; therefore, a Phase Two ESA is required in order to file an RSC for the Phase One Property, in accordance with the requirements of O. Reg. 153/04.

### **8.2 RSC BASED ON PHASE ONE ESA ALONE**

An RSC cannot be filed for the Phase One Property based solely on this Phase One ESA.

### **8.3 SIGNATURES**

The environmental assessment described herein was conducted in accordance with the terms of reference for this project, as agreed upon by Fora Developments and Terrapex Environmental Ltd.

The Phase One Environmental Site Assessment of the property located at 1856-1856A Keele Street and 2636-2654 Eglinton Avenue West, Toronto, Ontario which included the review, evaluation, and interpretation of the information obtained from the records review, interviews, and site reconnaissance has been conducted in accordance with Ontario Regulation 153/04 (Records of Site Condition – Part XV.1 of the Environmental Protection Act), made under the *Environmental Protection Act*, by or under the supervision of a Qualified Person. The qualifications of the assessors are included in Appendix VIII.

Terrapex has exercised due care, diligence, and judgement in the performance of this assessment; however, studies of this nature have inherent limitations. This report is intended to provide only a general assessment of the environmental conditions encountered at the site. By necessity, the findings and observations regarding actual or potential contamination of the property are based solely on the extent of observations and information gathered during the assessment, and subsequent investigations of differing scope may reveal conflicting results. Findings and observations may also change with the passage of time. Where applicable, observations of nearby properties were limited to areas visible from the site or from publically accessible areas and vantage points.

Terrapex has relied in good faith on information and representations obtained from the Client and third parties and, except where specifically identified, has made no attempt to verify such information. Terrapex accepts no responsibility for any deficiency or inaccuracy in this report as a result of any misstatement, omission, misrepresentation, or fraudulent act of those providing information. Terrapex shall not be responsible for conditions or consequences arising from relevant facts that were concealed, withheld, or not fully disclosed at the time of the study.

This report has been prepared for the sole use of Fora Developments , Terrapex Environmental Ltd. accepts no liability for claims arising from the use of this report, or from actions taken or decisions made as a result of this report, by parties other than Fora Developments .

Respectfully submitted,

<sup>1</sup> Areas of potential environmental concern (APEC) means the area on, in or under a Phase One property where one or more contaminants are potentially present, as determined through the Phase One environmental site assessment, including through,  
(a) identification of past or present uses on, in or under the Phase One property, and  
(b) identification of potentially contaminating activity.

<sup>2</sup> As set out in Column A of Table 2 of Schedule D.

<sup>3</sup> Contaminants of potential concern (COPC) according to the Method Groups as identified in the "Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act", March 9, 2004, amended as of July 1, 2011:

|   |                                   |              |                                 |
|---|-----------------------------------|--------------|---------------------------------|
| BTEX: benzene, toluene, ethylbenzene, xylenes | Hg: mercury                       | As: arsenic  | Cl: chloride                    |
| PHCs: petroleum hydrocarbons (F1-F4)          | B (hws): boron, hot water soluble | Sb: antimony | EC: electrical conductivity     |
| VOCs: volatile organic compounds              | Cr (VI): chromium (hexavalent)    | Se: selenium | SAR: sodium adsorption ratio    |
| PAHs: polycyclic aromatic hydrocarbons        | CN-: cyanide                      | Na: sodium   | PCBs: polychlorinated biphenyls |
